

# MOHANISH PINGALE

Full Stack Developer

8830121592 | [mpingale31@gmail.com](mailto:mpingale31@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## SUMMARY

Full Stack Developer proficient in MERN stack and Next.js. Experienced in building scalable RESTful APIs, authentication systems, and responsive frontends with dynamic UI. Strong in modern JavaScript/TypeScript, clean code practices, Git, and problem-solving.

## TECHNICAL SKILLS

<b>Frontend Development:</b>	HTML5, CSS3, JavaScript (ES6+), TypeScript, Next.js, React.js, Bootstrap, Redux, Responsive Web Design
<b>Backend Development:</b>	Node.js, Express.js, MongoDB, REST APIs (JavaScript/TypeScript)
<b>CS Fundamentals:</b>	Data Structures & Algorithms, OOPs. Solved 150+ DSA problems on LeetCode & Codeforces
<b>Tools &amp; Technologies:</b>	Git & GitHub, Postman, Docker, Linux

## EXPERIENCE

### Indux Technology

02/2026 - Present

#### Full Stack Developer Intern:

##### MagikPro / Nutri Native Foods E-Commerce Platform:

- **Contributed** to the development of a **multi-brand E-Commerce + CRM platform** supporting two brands under a single unified admin system with dynamic brand-based content rendering.
- Implemented key features including **product management**, **cart functionality**, and **order workflow**, ensuring proper separation of brand-specific data and UI.
- Worked with **Next.js (TypeScript)**, **Node.js**, **MongoDB**, **Tailwind CSS**, and integrated **Razorpay payment workflows** within the platform.
- **Participated** in client meetings to discuss new requirements, product improvements, and feature planning, contributing technical input during implementation discussions.

## PROJECTS

### Grove Crypto Tracker

02/2026 - 03/2026

#### Full Stack Crypto Portfolio Tracker:

- Built a full-stack **crypto portfolio tracker** using **React + TypeScript (Vite)**, **Redux Toolkit/RTK Query**, **Node.js/Express**, and **MongoDB** to manage authentication, holdings, and transaction history.
- Implemented **JWT authentication with HttpOnly cookies**, protected routes, and secure session handling with **CORS + credentials** for cross-origin deployments.
- Developed REST APIs for **portfolio CRUD** (add/delete transactions, holdings, stats) and integrated **CoinGecko API** for real-time prices, top coins, and market data.
- Improved performance and reliability with **in-memory caching**, input validation, and centralized error handling for consistent API responses across the app.

### QKart

09/2024 - 10/2024

#### Full Stack E Commerce Application:

- Developed and integrated a complete set of **RESTful APIs** for **QKart**, an e-commerce application, implementing core modules such as **authentication**, **shopping cart**, and **checkout** using **Node.js** and **MongoDB** following best practices.
- Built and tested scalable backend architecture leveraging MongoDB (NoSQL) for data persistence and ensured reliability through comprehensive **unit and integration testing**.
- Enhanced the frontend experience by implementing **responsive design** and **dynamic data rendering** via REST API integration, ensuring a seamless and consistent user experience across devices.

### MP's News Feed

08/2024 - 08/2024

#### Responsive News Feed Interface using multiple technologies:

- Developed reusable **JavaScript modules** for **accordion** and **carousel interactions**, centralizing **DOM selectors** and logic to improve maintainability and reduce breakage during UI updates.
- Extended baseline navigation utilities in **basePage** and combined them with **modular components** to streamline end-to-end coverage.
- Validated **Flipboard RSS** feeds via **data-driven specs** using curated magazine URLs to ensure consistent content rendering in automation runs.

## EDUCATION

Bachelor of Technology in Computer Science & Design

08/2022 – 07/2025

MET Institute of Technology

Diploma in Mechanical Engineering

06/2019 - 05/2022

Sandip Polytechnic
